Profile

Results-driven Full Stack Developer with 2 years of experience in building scalable and secure web applications. Proficient in frontend technologies like React.js and backend frameworks such as Node.js and Express.js. Strong problem-solving skills with a focus on clean, maintainable code. Quick learner and effective team player with a passion for delivering impactful solutions in dynamic environments.

Languages

- English
- Hindi

Education

MCA (Master of Computer Applications)

Amity University

present | Noida ,UP

BCA (Bachelor of Computer Applications)

Jagannath Institute of Management Studies

07/2019 – 08/2022 | Rohini , Delhi

Projects

Weather Application [🔗](#)

React

- **Description:** A React-based web application to view forecasted weather conditions for specific locations.
- **Technologies:** React.js, Axios.
- **Key Contributions:**
 - Fetched and displayed weather data from the OpenWeatherMap API.
 - Designed a user-friendly interface for displaying weather information.
- **Demo:** Weather App [🔗](#)

Book Management [🔗](#)

Backend project

- **Description:** Backend for a book management system inspired by Goodreads.
- **Technologies:** AWS S3, Multer, Moment.js, JSON Web Token (JWT).
- **Key Contributions:**

Skills

Javascript | NodeJs | Express JS | MongoDB |
REST API | GIT | Postman | Redis | React |
HTML | CSS | AWS S3 | Mongoose |
Sequelize | Socket | SQL

Professional Experience

Node Js Developer

App N Web technologies [🔗](#)

09/2024 – Present | Jaipur, india

- **Technical Expertise:** Developed a scalable full-stack application with multi-level user access (Admin, Company, Staff, Client, Supplier, Manufacturer). Secured authentication with JWT and bcrypt. Managed relational data using MySQL and Sequelize. Integrated Zoom Web SDK, Google Meet, and real-time chat via Socket.IO [🔗](#). Implemented email/OTP flows with Nodemailer, Twilio (WhatsApp), and Mailchimp. Handled file uploads with AWS S3 and maintained version control for documents and PDFs. Enhanced document processing using Puppeteer, PDF tools, and ExcelJS.
- **Projects:** GCRS-crft.
- **Integration of Third-Party Services:** Integrated third-party services such as Twilio for WhatsApp OTP verification, Mailchimp for email notifications, and Nodemailer for transactional emails to streamline user authentication and improve user engagement.
- **Collaborative Efforts:** Collaborated closely with cross-functional teams to deliver high-quality features, ensure seamless integration, and meet project milestones efficiently.

- Implemented file upload functionality using AWS S3 and Multer.
- Developed authentication and data management features.

E-commerce Website

Backend project

- **Description:** Backend for a shopping cart system inspired by Amazon, Flipkart, and Myntra.
- **Technologies:** bcrypt, Multer, JSON Web Token (JWT), AWS S3.
- **Key Contributions:**
 - Implemented user authentication and secure data storage.
 - Integrated AWS S3 for handling product images.

TODO application

- **Description:** A web application where multiple users can add, update, or delete tasks. Users can manage tasks from anywhere.
- **Technologies:** MongoDB, Express.js, React.js, Node.js, bcrypt, Mongoose, JSON Web Token (JWT), React-Bootstrap, React-Router-Dom.
- **Key Contributions:**
 - Implemented user authentication and authorization using JWT and bcrypt.
 - Developed RESTful APIs with Express.js for task management.
 - Designed the frontend with React.js and styled with React-Bootstrap.

URL Shortener

Backend project

- **Description:** Service to shorten long URLs, enhancing user experience by redirecting to the original long URL.
- **Technologies:** Express.js, ShortId, Mongoose, Redis, Axios.
- **Key Contributions:**
 - Developed the core URL shortening functionality.
 - Integrated Redis for caching and improved performance.

MERN Stack

Osnil Web Solution Pvt. Ltd 

06/2023 – 09/2024 | Remote, India

- **Technical Expertise :** Nodemailer, and creating a dynamic user interface using React and React-Router-Dom. Ensured secure user authentication with JWT and bcrypt, and utilized Mongoose, Redis and MongoDB for efficient data management, AWS S3 for images store. Developed robust REST APIs with Express and deployed the application on Netlify for smooth, reliable hosting.
- **Projects :** Appsala, Appsala Admin Panel, Brandemy ,Wisul.
- **Integration of Third-Party Services:** Successfully integrated external services for email notifications, and user authentication, ensuring seamless functionality and a positive user experience.
- **Collaborative Efforts:** Collaborated closely with cross.
